Who We Are

About Us

The Fort Vermilion School Division Student Support Services are teams of individuals who work collaboratively to help students in need of support. The team consists of **Child's Circle Workers**, **Student Wellness Coaches** and **Mental Health Therapists**.

Aim of Student Support Services

The Student Support Services teams promote positive mental health in children and youth by raising awareness, increasing knowledge, building personal skills, and developing interpersonal skills. The team members can offer family support, individual support and classroom support through universal and targeted programs.

"This program is essential to support students in their social-emotional well-being."

What can Student Support Services do for my child?

The Student Support Services team members can work with you and/or your child to foster positive mental health and an emotional state that will support learning in the classroom.

Some reasons we may work with your child include, but are not limited to: depression, anxiety, low self-worth, suicidality, grief and loss, diagnosis of a mental health disorder, drug or alcohol abuse, self-harm, withdrawal, friendship struggles, child of separation or divorce, trauma, bullying, anger management, social skills development or history of sexual abuse.

"I have seen a lot of positive improvement in my child this year..."

Confidentiality...

We know how important your privacy is...

It can be difficult to open up to someone about personal struggles; however, we believe that your confidentiality, and your child's, is of the utmost importance.

Everything that we talk about with you or your child is private and confidential. There are three exceptions to this rule:

- If your child is being hurt or has been hurt,
- If your child indicates he or she will harm someone else, or
- If your child intends to harm him or herself.

In these scenarios, we would make every effort to take the appropriate steps needed to keep your child safe.

"Student Support Services has helped our daughter open up and her problems were identified, and now she is getting appropriate help!"
